KENKEN®

Puzzles That Make You Smarter™

4x4 Hand-crafted Puzzle

Nov 2026 Solution

How To Play KenKen:

1. Fill in each square with a single number. In a 4x4 grid, use numbers 1 – 4. In a 6x6 grid, use numbers 1 – 6.
2. Do not repeat numbers in any individual row or column. For example, when you solve a 4x4 grid, each column and row should contain the numbers 1, 2, 3, and 4.
3. The numbers in each cage (heavily outlined set of squares) must combine IN ANY ORDER to produce the target number indicated in the cage using the noted math operation.
4. A number may be repeated within a cage as long as it's not in the same row or column.
